

# LandXML

Used to include additional information that is not explicitly defined by the LandXML schema. Feature may contain one or more Property, DocFieldRef or nested Feature elements. NOTE: to allow any valid content, the explicit definitions for Property, DocFieldRef and Feature have been commented out, but are still expected in common use.

A planimetric feature, not otherwise defined by the schema, such as building footprints, guard rails, tree line, lightpoles or signage.
